

The Olympic torch relay!

As you see it, what is the importance of the Torch Relay? Explain.

I think the importance of the torch relay is to show our support for our country and all the other countries. The torch is also a good sign for friendship and peace so more people will be nicer to each other and we won't be fighting all the time. The torch also shows remembrance of skiers and the marks that they put on the torch to show the Olympic winter games. I think the torch is very important to pretty much everyone even to the people who never even heard of it.

3. Submit your thoughts to our **forum**: For some Canadians, the 2010 Olympics are a cause for celebration and a source of pride. For others, the Games are no big deal. **If you were given an opportunity to see the Torch as it passes close to or through your community, would you accept or decline the invitation? Give reasons to explain your response.** *A good submission is clearly written, logically organized (including an introduction and a conclusion), and supported with plausible reasoning. We'll post the best ones!*

If I got an invitation to see the torch pass through our community I would accept because the torch is a sign of peace and friendship and if it passes through our community or town then some people might think about peace and friendship and maybe be nicer to their neighbors and everyone would think about the torch. I think it would be really cool to see the torch because I have never seen it in real life it would be a great experience to see it and watch it go through our community. So if I got to see the Olympic torch go through our community I would love it because I think a lot of people would also like to see it because it represents something that can help certain community's!!
